NEW AND EXCLUSIVE TO YUU!

It Doesn't Hurt To Have Smooth Skin

Soprano hair removal solution offers several incredible advantages to other available solutions, due to its unique combination of cutting-edge technologies, extra large applicator and advanced cooling system. These features let you feel fabulous fast – pain free!

The Beauty of 3

Featuring its exclusive 3D technology, Soprano combines the three most effective laser wavelengths into a single applicator, simultaneously targeting different tissue depths and anatomical structures within the hair follicle. This means that different levels within the skin are targeted all at once, leading to a much more effective treatment – and skin that stays hair-free longer.

Say Freeze!

Forget about pain or discomfort. Soprano includes a breakthrough cooling system, called ICE Plus that has been uniquely designed to keep your skin cool throughout the entire session. Sit back and chill out with a smoothie, as your skin becomes smooth and silky.

3-2-1 Smooth!

Another amazing benefit of Soprano is its extra-large TRIO 4cm² applicator. This means that the coverage area is much bigger, significantly shortening treatment times and making the entire hair removal process much more comfortable and convenient. You'll be out and about in less time than ever!

Please note: an essential patch test at the cost of £20 must be carried out prior to any treatment to determine Laser effectiveness and suitability for your skin. This cost is redeemable against the purchase of future Laser treatments.

IPL Permanent Hair Reduction

IPL (Intense Pulsed Light) Permanent Hair Reduction

Excess body hair is a common complaint for our male and female clients. Our versatile IPL services provide safe and effective hair reduction or removal for face and body. IPL is the only clinically-proven method of permanent hair reduction and, because it is virtually pain free, it's no surprise that it's our most popular treatment.

We want you to have the best IPL treatment that suits your skin type. That's why our specialists offer two different hair removal solutions and each can be tailored to your individual needs:

1 Formatk 'All-in-One'

Ground-breaking technology which offers IPL and a range of other skin and nail perfecting treatments.

2 Lynton Luminette

Can treat exceptionally delicate hair problems.

Only at Yuu, for you...

Many clients hesitate when considering IPL treatment due to anticipated high costs. At Yuu, our IPL treatments are priced per session to help you manage your beauty budget. We do not expect you to pay in advance for a course of treatments – all we ask for is a small deposit, redeemable against a future booking. If you're tired of other hair removal methods, then IPL is one affordable luxury you can't afford to miss!

Benefits

- safe and virtually pain-free procedure
- most effective form of hair reduction available
- long lasting results
- tailored IPL treatment preferences
- flexible payment options

Please note: an essential patch test at the cost of £20 must be carried out prior to any treatment to determine IPL effectiveness and suitability for your skin. This cost is redeemable against the purchase of future IPL treatments.

Skin Rejuvenation & Nail Fungal

Skin Rejuvenation

There are many reasons why skin begins to sag and lines form: pregnancy, weight loss, sun exposure and ageing are just some of the causes. The IPL Rejuvenation process uses IPL (Intense Pulse Light) to heat the under-layers of the skin, stimulating the production of collagen which is the substance that keeps the skin firm and supple. More collagen means firmer, smoother skin with a visible reduction in fine lines and wrinkles, particularly on the face, neck and décolletage. Hands, which can age much faster than other parts of the body because of their constant exposure to water and harsh chemicals, can also be rejuvenated to look smoother with a more even skin tone. After a course of IPL Rejuvenation, skin appears firmer and fuller.

Nail Fungal

Did you know that hand and nail fungus are increasingly common ailments? We at Yuu Beauty see countless clients, desperate to find a fast-acting, effective remedy to this unsightly problem. Thankfully, we are the first range of skin clinics to offer an exclusive, medically proven IPL treatment courtesy of world-class aesthetic company, Formatk. This is a truly unique and powerful therapy with often remarkable improvements after one session. Treatment of all ten fingers/toes is recommended to combat spread of fungus.

Fungal Nail Treatment

8-12 treatments are recommended to effectively reduce and get rid of bacterial fungal on nails.

Waxing & Threading

Lycon Hot Wax

Lycon is the latest waxing brand favoured by A-listers. Formulated using a series of aromatherapy ingredients, Lycon Hot Wax is a gentler yet more effective treatment which can remove hairs as short as 1mm. This is a low-temperature procedure where the wax shrink-wraps around the hair, pulling it out of the follicle (as opposed to pulling the skin). The result is much smoother skin – perfect for sensitive areas!

CACI Anti-Ageing Facials

The new CACI Synergy system combines the functionality of the two best-selling systems, the CACI Ultra and the CACI Ultimate and introduces pioneering S.P.E.D™ microcurrent LED technology, a breakthrough new advancement in microcurrent therapy. For the first time on the market, skincare specialists will be able to harness the power of LED light therapy at the same time as using microcurrent. The dual action of simultaneous LED and microcurrent energy stimulates tissue regeneration and helps in the production of collagen. The synergy of these two technologies provides more visible and longer lasting results.

The CACI Synergy offers: new S.P.E.D™ microcurrent LED technology, orbital dermabrasion, ultrasonic peeling and CACI's unique Wrinkle Comb (a non-invasive alternative to dermal fillers). With so many treatment options available, salons can now offer a complete range of anti-ageing and skin rejuvenation solutions using just one advanced treatment system.

Medical Microdermabrasion

Medical Microdermabrasion & Diamond Peel

Microdermabrasion is one of the most popular aesthetic procedures on the market. Here at Yuu, we offer two different options for this type of treatment – Medical Microdermabrasion and Diamond Peel Microdermabrasion.

For Medical Microdermabrasion, our Derma Genesis machine can perform crystal or crystal free treatment, depending on your skin type. This state of the art technology is proven to be clinically effective for issues including dry or oily skin, fine lines and wrinkles, hyperpigmentation, sun damaged skin and scar tissue reduction.

Diamond Peel Microdermabrasion is a slightly gentler treatment, which can be altered according to body area and abrasion level, is a controlled form of surfacing in which diamond grain gently exfoliates the outer layer of the skin. These procedures promote collagen production, and the results are immediate – skin is visibly rejuvenated and firmer.

Microdermabrasion is safe, painless and suitable for face, neck and body. For optimum results, a course of treatments is recommended.

Near-Infrared skin tightening with Titanium Soprano is an effective treatment for treating loose skin on many areas of the body. It's commonly used for the face, neck, upper arms, abdomen and hands. It works by passing a safe near-infrared light over the skin, gradually heating the water content deep in the tissue below the skin. This causes collagen fibres to contract and tighten, resulting in the smoothing out fine lines and tightening of sagging skin. Fibroblasts are also stimulated which promote new collagen formation.

During the treatment you will feel a warm sensation, but the outer skin is kept cool. The treatment has often been likened to as a hot stone massage. After treatment your skin may look a little flushed for a couple of hours, but this usually subsides very quickly.

You can apply make-up immediately, and you would expect to resume normal activities straight away. Generally, the best results are achieved after 5 treatments, with 2-4 weeks between visits. After a course of treatment, you may wish to have a top up treatment every 6-12 months to combat the natural ageing process.

One technology that has been proven to deliver amazing results is the Dermapen™. The treatment is a form of collagen induction therapy where a series of needles penetrate the skin causing thousands of micro injuries at a vertical angle using a specialist medical device, for both faster and more precise needle penetration. The procedure leads to increased collagen production, which effectively repairs scars, reduces hyper-pigmentation and renews tired looking skin.

The Dermapen™ has revolutionised micro skin needling, making it easier, safer and less painful to get maximum results compared with traditional Derma Roller skin needling. The results are more extraordinary, longer lasting and treatment time is faster, making this a top choice for anyone looking to achieve younger and smoother skin. The benefits of Dermapen™ Treatments are multiple, and the most effective ones are:

- Skin Tightening, Natural Collagen
- Induction, Lifting & Rejuvenation
